

Secure Cloud Faxing for KYOCERA MFPs

Cloud Faxing vs. MFP Fax Kits

eGoldFax Pure Cloud Faxing offers many benefits unavailable with traditional MFP faxing:

Reliability. Never miss a fax due to a busy signal or telco outage

Cost Savings. Eliminates the cost of MFP fax hardware, analog fax lines, and long-distance transmission charges

Archive. Free encrypted PDF archive of all fax pages

Universal Access. Fax from the MFP or any desktop computer, tablet, or smart phone

Scalability. Supports unlimited users and MFPs to seamlessly grow with your business

Security. Delivers a higher level of security with TLS 1.2 encryption and PCI-DSS Level 1, Scope 3.2 Certification

Compliance. Adheres to compliance standards for HIPAA, PCI DSS, GDPR, FERPA, FedRAMP, and more

eGoldFax Pure Cloud Faxing™ is a cloud fax service for KYOCERA® Scan-to-Email multifunctional products (MFPs). eGoldFax provides secure, reliable, and scalable faxing for KYOCERA MFPs with a seamless integration that eliminates the cost, maintenance, and limitations of traditional MFP fax hardware and MFP fax lines.

Enterprise-grade Features Everyone Can Afford

- **Admin Portal.** Manage user lists, create fax routing rules, access archive.
- **Secure Fax Access.** Bypass email to access faxes stored in the eGoldFax cloud via a secure HTTPS pull-down within the eGoldFax portal.
- **Advanced Fax Routing.** Automatically route inbound faxes based on defined routing rules to streamline business processes.
- **Free Fax Archive.** Optionally save sent and received fax pages as 256-bit AES Encrypted PDFs for up to 10 years.
- **Intelligent Fax Applications.** Save XML metadata and execute SQL statements directly into business applications.

Easy to Install. Easy to Use.

All you need is Internet access and an email address.

- No software to install
- No MFP fax hardware to install or maintain - Save money
- No fax telephone lines needed - Save money
- No training required. Sending a fax is just like sending an email
- Get up and running fast. No upfront costs or long-term contracts

eGoldFax supports unlimited users and is available on every one of your KYOCERA MFPs.

How Does it Work?

eGoldFax is easy to use. Fax digital documents from email. Scan and fax from Kyocera MFPs. Received faxes can be routed to email, network printers and folders.

Scan and Fax Paper Documents from Kyocera MFPs

Scan-to-Email MFPs:

Select Scan-to-Email, enter

FaxNumber@egoldfax.com in "To:" field.

Select recipients from email address book.

Optionally, enter Subject and Message text.

E-mail Address Entry

E-mail Address: 7146951010@egoldfax.com

KYOCERA AccuSender Fax MFPs:

Select AccuSender (optional KYOCERA HyPAS app) from touch panel, enter the Fax Number, and press "Scan and Send."

KYOCERA Series 3 FAX Server Mode MFPs:

Press Send button, then select FAX Server from touch panel, enter the Fax Number or select from Address Book, press "Scan and Send."

Fax Digital Documents

Send TLS1.2 encrypted email from desktop computer, tablet, or smartphone to:

FaxNumber@egoldfax.com. Attach files (Word documents, PDFs, spreadsheets, image files).

The Subject and Message text are included on fax cover page, including email signature and logos. Receive "Fax Confirmation" email (optional Thumbnail and PDF of sent pages).

Authorized eGoldFax Reseller

Receive and Route Faxes

With eGoldFax, fax documents are securely routed directly to the intended recipient(s).

- ✓ Keep your existing fax numbers and transfer (port) them to eGoldFax. Obtain new fax numbers and assign to users, department, locations, and business processes.
- ✓ Route inbound faxes directly to the intended recipient, department, or branch office via email, network folder, or printer.
- ✓ Optionally receive a notice of inbound faxes (with no fax attachment) with a secure HTTPS download link to access the fax.

Enterprise Options next Gen

- ✓ Received Faxes to Network Printers/Folders
- ✓ Print "Sent Fax Confirmation" to MFP
- ✓ Save "Sent Fax Confirmation" to Folder
- ✓ Data base integration (XML, SQL statements)

Seamless Transition

Getting started with eGoldFax couldn't be easier. Get up and running fast with no upfront costs, long-term contracts, or user training.
